

Overview

Evolu™ CMS 2008 is a **content management system** that allows you to easily setup and administer your own company website or Intranet.

Based upon seven years of customer feedback and product refinement, Evolo CMS 2008 provides your business with the essential online tools necessary to create, deploy and administer a scalable future proof website. It's sophisticated, yet easy enough to be used and adopted by users throughout your organisation.

Key Benefits

- **Affordable.** Especially for NZ small and medium businesses.
- **Intuitive user interface.** Easy to learn and use.
- **SaaS (Software as a Service) solution.** Reduce Web management and IT expenses with regular software updates and support at no additional cost (subscription licensing). Utilise the latest hardware and Internet connectivity.
- **NZ hosted and supported.**
- **Make updates anytime, anywhere.** Remove all the hassles associated with organising and briefing in changes to a Web Designer or Developer. Simply login through a browser and you can update your content yourself from your office, home, laptop, or even when you're travelling.
- **Save time and money.** Create, deploy and update your website in no time at all.
- **Promotes Web industry best design principles and techniques.** Evolo CMS 2008 promotes best practise techniques for building websites and Intranets.
- **Enable consistent branding and quality throughout your website or Intranet.**
- **SEO optimised.** Evolo CMS 2008 utilises key technical and content based principles to ensure that your website is always optimised for Search Engines.
- **Scalable.** Easily add pages, sections and custom modules.
- **Simple.** Evolo CMS 2008 is designed to manage websites, not drive you crazy with useless modules that defer from that purpose.
- **Versioning.** When it is important to maintain strict version control over your site structure and content, Evolo CMS 2008 enables both page and website versioning to provide legal accountability, backup and disaster recovery.
- **Workflow.** Having the right people create the content ensures buy-in. Having the right people authorise content ensures accuracy of information.
- **Audit Trail.** Access a detailed log of all administrative functions for accountability and debugging purposes.

Evolu™ CMS 2008 is an Industry proven solution for managing your Internet, Intranet or Extranet website(s)

Evolu™ CMS 2008 is available as an SaaS (Software as a Service) solution, or as an installable web application if used for an Intranet.

Key & Unique Features

- **Unlimited pages.** Tested to easily handle thousands of pages.
- **Unlimited categories and sub categories.** Create nested categories with easy sorting and functional characteristics (such as menu options, template, etc).
- **Password protected pages.** Enable public password protection on a category and all associated subcategories and pages.
- **Flexible page types.** Includes dynamic/database driven pages, redirect pages and the ability to define editable regions in and edit static HTML or PHP pages.
- **Unified login system.** Enables multiple domain/website administration and maintenance.
- **Version control.** Full page and website versioning with roll-back. Recycle bin.
- **Auto save and recover.** Automatic saving of page content during editing for recovery in the event of a browser or computer crash.
- **User Accounts, rights and permissions administration.** Permission can be restricted down to a particular category or administrative function.
- **XHTML compliant WYSIWYG Microsoft® Word-type editor.** Facilitates easy content authoring without HTML knowledge. Fully configurable editor on a per website basis to meet the needs of the organisation. Includes advanced features such as colour coded source, image editing, spell check, etc.
- **Search engine friendly URL's, also allowing for advanced SEO per page.**
- **Easy Template System.** Simply drop in existing HTML templates from your designer and customise with built-in CMS tags for special functionality.
- **Support for articles & news articles .** Includes news and article page types with send to friend feature, printable version and summary pages.
- **Full-text search feature.**
- **Centralised File Library.** Supports Macromedia® Flash, Microsoft® PowerPoint, Microsoft® Word, Microsoft® Excel, PDF and a wide range of image and media files.
- **Dynamically generated horizontal and vertical navigation menus.** Fully customisable CSS controlled menus.
- **Automatically generated breadcrumbs.**
- **Workflow.** A streamlined creation and approval process.
- **Logging.** All administrative functions are logged for administrator review.
- **Evolu™ EmailStudio integration.** Capture newsletter subscribers, display RSS feeds of archived newsletters or follow up enquiries with time-sensitive autoresponder emails. Requires optional Evolu™ EmailStudio subscription.
- **Custom Modules.** Develop your own custom .php modules for extensibility.
